TURN-KEY LABOR CAMP SOLUTION

LABOR CAMP SOLUTION

Our job is to satisfy the needs of our customers. We realize complete labor camp under the project required.

You can lay the buildings on concrete slabs or foundations or you can apply the system created and designed by our technicians on metal platform 100% recoverable.

Quick installation of steel structures and proper thermal insulation as expected giving to the buildings with all its partitions and details.

We are able to grant a turn-key solution, so developing project , the supply, the building up and furthermore all internal equipments.

PRODUCTION PLANT

Edil Euganea born in 1957, has its principal production line on 25.000 sqm total surface.

The production of the products follow a well studied production lay-out, divided from the different assembling lines.

PACKAGING AND SHIPMENT

All prefabricated units are disassembled and easily packed for shipment

Packages are shipped by naval containers and/or trucks

Prefabricated units could be easily lifted by cranes and/or fork lift;

all assembled units have four corner hooks installed on the roof

SINTHETIC PRODUCT SHEET

- **STRUCTURE:** it is made up by base and roofing section bars. It is an all steel unit with appropriate thickness from 1,5 mm till 4,0 mm

- **WALLS , ROOF:** are made with sandwich type modular panels.

The whole thickness is 30 / 40 / 50 / 60 / 80 / 100 / 120 mm

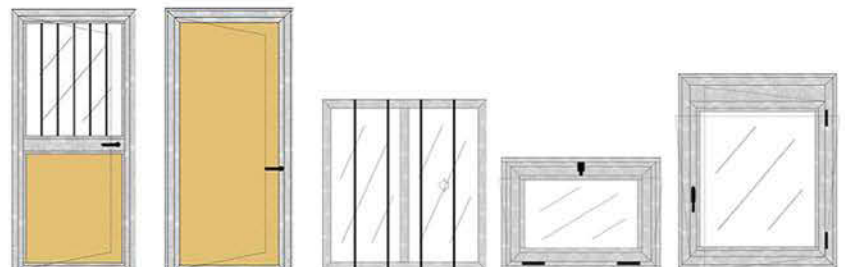

Type of insulation	Polyurethane foam	Rockwool (fireproof)
Wall panel thickness (mm)	40 - 50 - 60 - 80	50 - 80 - 100
Transmittance U (W/m ² K)	0,54 - 0,44 - 0,37 - 0,28	0,75 - 0,49 - 0,39
Roof panel thickness (mm)	30/70 - 40/80 - 50/90	50/90 - 80/120 - 100/140
Transmittance U (W/m ² K)	0,55 - 0,44 - 0,36	0,78 - 0,50 - 0,41

- **FLOOR:** made in PVC or ceramic or steel sheet fixed to a special wood panels or other steel

- **FIXTURES AND WINDOWS:**

in PVC or aluminium electro painted varnished, equipped with different thickness glasses, with possibility to insert different type of finishing and color

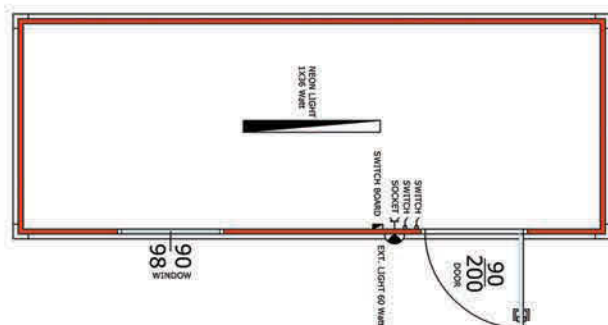

- **ELECTRICAL SYSTEM:** complete and well functioning provided with visible cables trough the inside walls, according to the local norms

- **PLUMBING SYSTEM:** complete and well functioning provided with visible cables through the inside walls.

FLEXIBILITY AND MODULARITY OF OUR PREFABRICATED

Starting from a singular module we compose each kind of different project

Tech. Features	
Size:	
Lenght	590 cm
Width	230 cm
Height	223/240/270 cm
Surface	13,57 m ²

By adding or coupling or joining more standard prefabricated units it will be possible to have the required size for each modular building
