

EDIL EUGANEA: 1957 the year of birth, Poletto Gino the founder.

A journey started from afar where the value linked to **human capital** is tangible and is what still supports and guides every choice.

From the founder Gino to his son Sergio and now to his nephews Fabio and Luigino, the company mission has evolved over time but not changed in substance.

Edil Euganea not as a company devoted to mass production, but to a **sustainable**, **personalized production**, **capable of renewing processes and products**, seeking continuous improvement with total respect for our surroundings.

Product, process, price and quality are for Edil Euganea words that cannot living apart.

No quality product is possible if you do not invest in a constant innovative production process, no product can be spent if customers' real price needs are not considered.

A GROUP OF PEOPLE ENJOYED AT ITS WORK, A CONTINOUS PROPENSION TO IMPROVEMENT IS AIMED TO ENHANCE WHAT IS PRIMARY FOR US: QUALITY, THE CUSTOMIZATION OF EVERY PRODUCT, THE DETAIL, THE PRE AND AFTER SALES SERVICE, THE CORRECTNESS AND THE RELIABILITY.

Knowing the demands of the market is crucial but for Edil Euganea **knowing your customer in detail** is even more important.

Customization is the key word.

For this reason Edil Euganea has decided to innovate the product by studying it in detail and modifying it based on its use.

It has thus created **specific internal working teams and people** able to realise the specific needs of the concerned market into dedicated, high-performance solutions.

For this reason a great subdivision of the tasks and **internal training** necessary to present Edil Euganea in its most extreme focus.
