Mission.

The mission of **MINITOP**[®] is constant research of the highest quality in production and service.

The customer is always at the heart of **MINITOP**[®].

Our daily commitment is to have individual relationships with our **MINITOP**[®] customers.

The Sales team is always eager to offer our customers its great knowledge, competence and courtesy.

Minitop for the environment.

MINITOP[®] is aware that the planet is a great resource which must be used with respect and consciousness for future generations.

The sustainability is part of what we are and what we do every day.

We believe there must be a balance between environmental impact, social responsibility and economical growth.

The rubber track quality starts from its structure.

Targeted solutions for different applications.

The technical dpt designs and develops rubber tracks of high technical level, with different pattern types to perform high reliability, resistance and grip. The sales dpt is always ready to give technical advice to meet customers expectations regarding durability and performance of our rubber tracks according to use.

High products availability.

Wide variety of sizes with quick and reliable delivery times.

MINITOP® offers a wide range of rubber tracks with more than 400 different sizes and a warehouse which covers 10.500 sqm.

At the moment the range includes sizes from 150 mm to 1.000 mm of width and from 15 kg to 2.000 kg each, suitable for more than 6.000 models.

MINITOP® ships goods all over Europe daily with express courriers who have quick and reliable delivery times.

The reliability of the tyre starts from the inside.

Durability guarantee
and high performance
for every use.

In 2015 **MINITOP®** introduced tyres for **skid steer loaders** with a wide range of sizes and different patterns for several terrains.

The tyres are manufactured with a well-calibrated compound of natural and synthetic high quality rubber.

By your side in your daily work.
